

## Eager to catch a toothy pike?

Little Atlin Lake is a popular and valuable Northern pike and lake trout fishery that can see a great deal of pressure given that it is so close to Whitehorse.

Northern pike are one of Yukon's most aggressive fish to catch, they are also spring spawners and can be vulnerable during this time. A good practice to help these fish survive is through the use of single barbless hooks, to help decrease injuries.

These are also great fish to eat, consider catching and keeping one legal size pike and frying it up.

With a little Youtube tutorial you'll be filleting out those bones in no time.
